

Brice Beffara

Assistant Lecturer & Research Scholar - Psychology
Besançon, France

✉ brice.beffara@univ-fcomte.fr  [bricebeffara](#)  [brice_beffara](#)  [slowpen.science](#)

Current position

Academic

[Université de Franche-Comté, France](#)

Assistant lecturer (ATER)

September 2018 - present

Independent

[The Walden III Slowpen Science Laboratory](#)

Research scholar (co-founder)

January 2017 - present

Research Interests

I am interested in understanding flexibility, stress, and conservatism at (social) behavioural, cognitive and physiological levels. I am studying how flexibility and conservatism are related to (un)learning, threat perception and prosociality. I use heart rate variability (HRV) as an index of physiological flexibility. The aim is to understand how to regulate unflexibility by positive social context. I also develop projects in psychological methods. My current research works follow open science practices as much as possible.

Social cognition and psychophysiology

Regulation of (social) threat perception, stress, and HRV by social context

Stress and psychophysiological (un)flexibility

HRV and emotional facial expressions processing

HRV and prosocial behaviours

Methods

Safe sequential data analysis

Open science practices in the european francophone psychological science community

Teaching Interests

My main teaching interests are social psychology, methods and data analysis. I use social psychology examples to help students understand the basics of methods and data analysis. Social psychology experiments often provoke a strong interest in students which seems to increase attention toward “cold” methodological notions. I progressively introduce novel scientific practices to students and help them mastering it. I value cooperation instead of competition in learning, mastering instead of performance goals, as much as possible.

Scientific Affiliations

Society for the Improvement of Psychological Science	2019
Association pour la Diffusion de la Recherche Internationale en Psychologie Sociale	2018 - 2019
Association for Psychological Science	2016 - 2017
International Society for Research on Emotions	2015 - 2016
Society for Affective Science	2015 - 2016

Past positions

Université de Lyon, France

Post-doctoral researcher January 2018 - August 2018

Interdisciplinary project : [Regulation of psychophysiological well-being by urban greenery](#)

Project hosts
